Prices for Consent as a Service

For the Consent as a Service solution, SIX BBS Ltd ("SIX") charges the Participant a monthly base price and a price per consumer token kept in custody.

Invoices shall be issued on a monthly basis.

1. Base Price

For the use of Consent as a Service, a base price is due as follows:

Price	Price per month in CHF
Base price	100.00

This price is charged once per month, regardless of the number of consumer tokens held in custody by SIX for the Participant.

2. Price for Token Custody

For the number of consumer tokens held for the Participant, the following prices apply:

Number of consumer tokens held in custody (as of month-end)		Price per token in custody (CHF)
from	to	
1	1'000	0.200
1'001	10'000	0.100
10'001	50'000	0.050
50'001	100'000	0.025
100'001	1'000'000	0.010
1'000'001		0.001

The price for token custody is calculated on a tiered basis. The price specified for each tier applies only to the number of consumer tokens falling within the respective tier. Where the number of consumer tokens spans multiple tiers, the amounts calculated for each applicable tier are added together. The resulting total constitutes the monthly price for token custody.

The number of consumer tokens held in custody is determined as of the last day of each respective month.
